

3 Column Table

BHAG (Big Hairy Audacious Goal) – Overarching Course Goal

Learners will ... build their own ePortfolio platform that they can use as a means of reflecting on learning experiences, research findings, and collaborate and communicate ideas with others.

Learning Goals	Learning Activities	Assessment Activities
Foundation Learners will explore how ePortfolios can be used to share ideas and skills.	Research Blog posts Reflection Discussion	Review and research other ePortfolios and guidelines for online interaction. Learners will begin developing their own ePortfolio on their own platform.
Application Learners will be able identify how design layout and the use of information can contribute to effectively sharing their reflections.	Research Blog posts Reflection Discussion	Learners will continue to work on the layout of their ePortfolio and build a site of their own, working to make improvements, make their site interactive and user friendly.
Integration Learners will recognize the importance of using their voice and how important it is to them as individuals.	Blog post Reflections Presentation Discussion	Learners will find learn about finding their voice and understand who their audience is. Students will learn the importance of taking ownership of their learning as they continue to showcase their learning through projects and reflections.
Human Dimension/Caring Learners will be able to collaborate and communicate with each other as they share, evaluate and provide feedback on each other's ePortfolio.	Blog posts Reflection Presentation Discussion	Learners will evaluate other ePortfolios while continuing to build and post examples of their learning. They are to give constructive feedback on layout, design, functionality etc., to help learners improve their site.
Learning How to Learn Learners will use research	Blog posts Reflection	Finalize ePortfolio through a final reflection

strategies and information that will help guide them in the learning community to design and implement their ePortfolio.	Discussion	blog and connect all learning examples from the course into the blog post.
